EDUCATION

SRM University AP | Bachelor of Technology, Computer Science and Engineering | 2024 - 2028
Andhra Pradesh, India | 3rd Year | GPA: 8.1 / 10.0

WORK EXPERIENCE

Product Engineering Intern - AI | CCC Digital India Private Limited, Hyderabad | May 2026 - July 2026

- Designed and developed an AI-powered Placement Recommendation System to provide personalized internship and job recommendations based on student profiles, skills, academic performance, and career interests
- Built intelligent workflows for resume parsing, skill extraction, job matching, company recommendation, and personalized learning roadmap generation using Large Language Models (LLMs) and prompt engineering
- Engineered AI-driven modules for skill gap analysis, placement readiness scoring, ATS resume evaluation, and career recommendation to improve student employability outcomes
- Integrated LLM APIs, prompt engineering techniques, and automation workflows to generate accurate context-aware recommendations while optimizing prompt performance and response quality
- Contributed to backend development by integrating REST APIs, database operations, and scalable AI recommendation pipelines ensuring maintainable and production-ready code

Research Intern - Natural Language Processing | SRM University AP, Andhra Pradesh | May 2026 - July 2026

- Conducted research on Natural Language Text Summarization using Large Language Models (LLMs) including GPT and BERT Transformer-based architectures for academic and domain-specific datasets
- Implemented and evaluated extractive and abstractive text summarization techniques using modern NLP frameworks and pretrained language models achieving measurable performance improvements
- Worked with Python, PyTorch, Hugging Face Transformers, and NLP libraries for model development, fine-tuning, and experimentation on custom datasets
- Performed text preprocessing pipeline including tokenization, stemming, stop-word removal, and dataset preparation; evaluated models using ROUGE and BLEU metrics

CERTIFICATIONS

MongoDB Associate Developer Certification | MongoDB Inc. | April 2026 | [Verify on Credly](#)

MongoDB Node.js Developer Path | MongoDB Inc. | April 2026 | Credential ID: MDBzg7q21110a

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, TypeScript, HTML5, CSS3, SQL

Frontend Technologies: React.js, Next.js, Vite, Tailwind CSS, Chart.js, Framer Motion, Responsive Web Design, DOM Manipulation

Backend Technologies: Node.js, Express.js, Flask, REST API Development, JWT Authentication, bcrypt, Middleware Design

Databases: MongoDB, MongoDB Atlas, Mongoose, Supabase, PostgreSQL, Database Schema Design

Artificial Intelligence and Machine Learning: Large Language Models, LLM APIs, Prompt Engineering, AI Agent Development, PyTorch, Hugging Face Transformers, BERT, GPT, NLP, Text Summarization, ROUGE, BLEU

Cloud and Deployment: Vercel, Render, Cloudinary, Google OAuth 2.0, Supabase Auth, Environment Configuration

Developer Tools: Git, GitHub, VS Code, Postman, MongoDB Compass, npm, REST API Testing

PROJECTS

Portfolio - Personal Developer Website | React.js, TypeScript, Vite, Tailwind CSS, Framer Motion | <https://raunakrai.vercel.app>

- Designed and developed a modern fully responsive personal portfolio website with custom animated cursor, interactive starfield canvas background, and typewriter hero animation effect

- Built with React 19, TypeScript, Vite 8, Framer Motion page transitions, and Tailwind CSS; deployed on Vercel with custom domain raunakrai.vercel.app for fast global delivery

RentEase - Full Stack Rental Platform | React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Leaflet.js | <https://rentease-azure.vercel.app>

- Built a production-grade PG and room rental web application for the Indian market with role-based access control supporting Tenant and Landlord user roles each with a dedicated dashboard
- Implemented full CRUD operations for listing management with Cloudinary image uploads supporting up to 5 photos, interactive Leaflet.js maps with OpenStreetMap, reviews and ratings system, and bookmark functionality
- Developed advanced search and filter system by city, rent range, room type, gender preference, and amenities with URL parameter synchronization for shareable search links
- Designed and deployed 10 RESTful API endpoints with MongoDB Atlas database and Mongoose ODM; seeded 12 realistic Indian PG listings across 6 major cities

FinFlow - Full Stack Finance Dashboard | React.js, Node.js, Express.js, MongoDB, JWT, Chart.js, Tailwind CSS | <https://finflow-thzg.onrender.com>

- Built a production-grade personal finance web application with JWT-based authentication including signup, login, and persistent sessions using httpOnly cookies to prevent XSS attacks
- Designed and implemented 9 REST API endpoints for CRUD operations on transactions, budgets, and financial insights using Express.js and MongoDB Atlas with Mongoose
- Created interactive data visualizations using Chart.js including 30-day spending trend line chart and expense category donut chart with real-time data processing
- Implemented AI-powered insight engine that analyzes transaction patterns to detect overspending and generate personalized savings projections and financial alerts

DevPulse - GitHub Profile Analyzer | HTML5, CSS3, JavaScript, GitHub REST API | <https://devpulse-1dcgrc2f8-raunak-cybersecs-projects.vercel.app>

- Built a GitHub profile analyzer using vanilla JavaScript and the GitHub REST API to fetch real-time user statistics, repository data, language usage, and contribution history
- Computed a developer score out of 100 based on repositories, followers, stars, and activity using a custom weighted scoring algorithm with animated SVG ring visualization
- Implemented animated language bar charts, circular score ring with SVG stroke animation, and AI-generated developer profile insight panel; deployed on Vercel with zero build step

RELEVANT COURSEWORK

Data Structures and Algorithms | Object-Oriented Programming | Database Management Systems | Operating Systems | Computer Networks | Web Technologies | Natural Language Processing | Software Engineering Principles

PROFESSIONAL SUMMARY

3rd year B.Tech Computer Science and Engineering student at SRM University AP with 2 active internships in AI product engineering and NLP research. MongoDB Associate Developer certified. Experienced in full-stack web development using React.js, Node.js, MongoDB, and REST API design. Skilled in AI and machine learning including Large Language Models, prompt engineering, and NLP. Built and deployed 4 production web applications. Strong understanding of software engineering principles, object-oriented programming, and data structures. Seeking software engineering or full-stack development internship opportunities.
