EDUCATION

SRM University AP — B.Tech in Computer Science & Engineering | 2023 – 2027

Andhra Pradesh, India • 2nd Year

WORK EXPERIENCE

Product Engineering Intern (AI) — CCC Digital India Private Limited | May 2026 – July 2026

- Designed and developed an AI-powered Placement Recommendation System providing personalized internship and job recommendations based on student profiles, skills, academic performance, and career interests
- Built intelligent workflows for resume parsing, skill extraction, job matching, company recommendation, and personalized learning roadmap generation using Large Language Models (LLMs)
- Engineered AI-driven modules for skill gap analysis, placement readiness scoring, ATS resume evaluation, and career recommendation to improve student employability insights
- Integrated LLM APIs, prompt engineering techniques, and automation workflows to generate accurate, context-aware recommendations while optimizing prompt performance and response quality
- Contributed to backend development by integrating REST APIs, database operations, and scalable recommendation pipelines, ensuring maintainable and production-ready code

Research Intern — SRM University AP | May 2026 – July 2026

- Conducted research on Natural Language Text Summarization using Large Language Models (LLMs) including GPT and Transformer-based architectures
- Implemented and evaluated extractive and abstractive text summarization techniques using modern NLP frameworks and pretrained language models
- Worked with Python, PyTorch, Hugging Face Transformers, and NLP libraries for model development and experimentation
- Performed text preprocessing, tokenization, stemming, stop-word removal, dataset preparation, and model evaluation using standard NLP metrics

CERTIFICATIONS

MongoDB Associate Developer — MongoDB, Inc. | April 2026

Industry-recognized certification • Verify: credly.com/badges/f63910b2

MongoDB Node.js Developer Path — MongoDB, Inc. | April 2026

Credential ID: MDBzg7q21110a

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React.js, Vite, Tailwind CSS, Chart.js, Framer Motion, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt

Database: MongoDB Atlas, Mongoose • MongoDB Associate Developer Certified

AI / ML: PyTorch, Hugging Face Transformers, NLP, BERT, GPT, ROUGE/BLEU metrics, Prompt Engineering, LLM APIs

Tools: Git, GitHub, VS Code, Vercel, Render, Postman, Pandas, NumPy

PROJECTS

RentEase — Full-Stack Rental Platform — React · Node.js · Express · MongoDB · JWT · Leaflet.js ·

Cloudinary [Live Demo](#) 

- Built a production-grade PG and room rental platform for the Indian market with two user roles — Tenant and Landlord — each with a dedicated dashboard

- Implemented full CRUD listing management with Cloudinary image uploads, interactive Leaflet.js maps, reviews/ratings system, and bookmark functionality
- Built advanced search and filter — by city, rent range, room type, gender preference, amenities — with URL param sync for shareable search links
- Designed 10 REST API endpoints, MongoDB schemas for Users, Listings, SavedListings; seeded 12 realistic Indian PG listings across 6 cities

FinFlow — Full-Stack Finance Dashboard — React · Node.js · Express · MongoDB · JWT · Chart.js ·

Tailwind CSS [Live Demo](#) 

- Built a production-grade personal finance web app with JWT-based authentication — signup, login, persistent sessions using httpOnly cookies
- Designed and implemented 9 REST API endpoints (CRUD for transactions, budgets, insights) with Express.js and MongoDB Atlas
- Created interactive dashboards with Chart.js — 30-day spending line chart and expense category donut chart updating in real time
- Implemented AI insight engine that analyzes transaction data and surfaces smart alerts like overspend warnings and savings projections

DevPulse — GitHub Profile Analyzer — HTML · CSS · JavaScript · GitHub REST API [Live Demo](#)

- Built a GitHub profile analyzer using vanilla JS and the GitHub REST API — fetches live user stats, repos, and language data
- Computed a developer score out of 100 based on repositories, followers, stars, and activity using a weighted algorithm
- Rendered animated language bar charts, circular score ring with SVG stroke animation, and an AI-generated profile insight panel

Portfolio — Personal Developer Website — React · Vite · TypeScript · Tailwind CSS · Framer Motion [Live Demo](#)

- Designed and developed a modern, fully responsive personal portfolio with custom animated cursor, starfield canvas background, and typewriter hero effect
- Built with React 19, TypeScript, Vite 8, Framer Motion animations, and Tailwind CSS — deployed on Vercel with custom domain raunakrai.vercel.app

ABOUT

2nd year CSE student at SRM University AP — MongoDB Associate Developer certified, currently interning as a Product Engineering Intern (AI) at CCC Digital India building AI-powered recommendation systems, and as a Research Intern at SRM AP on LLM-based text summarization. Builds and ships full-stack web applications using React, Node.js, and MongoDB. Actively seeking a paid web development internship to contribute to real products alongside a strong engineering team.
